👤 Profile

A highly skilled full-stack developer capable of working independently, delivering clean, elegant, and maintainable code. Seeking a long-term role to continue growing and contributing.

📁 Professional Experience

Tax Pro Accelerator ✎

06/2024 – present | Georgia, USA

Front-End Web Developer

- Designed and developed the company website from scratch using Next.js and TypeScript
- Built a reusable templated system to rapidly deploy customized client websites
- Implemented responsive UI and advanced animations with Tailwind CSS and Framer Motion
- Integrated Stripe for payment processing and Calendly for appointment scheduling
- Set up automated email workflows using Nodemailer
- Integrated OpenAI Assistants API to power intelligent chatbot interactions

AskAbogado ✎

11/2024 – 01/2025 | Makati, Philippines

Full Stack Developer

- Developed and maintained core features of a legal tech platform serving Filipino users
- Collaborated directly with the CEO and senior developer to define and deliver product requirements
- Implemented structured version control and CI/CD pipelines using GitHub Workflows
- Wrote unit and integration tests with Jest to ensure code quality and platform stability
- Strengthened team collaboration and contributed to code quality standards through code reviews and Git best practices

Stratpoint Technologies ✎

08/2022 – 05/2024

Software Engineer II

Mandaluyong, Philippines

- Transitioned between multiple internal and client projects as a full-stack developer, utilizing React.js and Next.js for frontend development and Express.js for backend services.
- Conducted unit testing and worked with both SQL and NoSQL databases to ensure reliable and scalable solutions.
- Delivered product demos to stakeholders and maintained project alignment with Agile Scrum methodologies.
- Engaged in cross-functional collaboration with engineers, designers, producers, and clients to address both frontend and backend requirements through effective technical discussions.
- Enhanced system security and mitigated risks by conducting Vulnerability Assessment and Penetration Testing (VAPT) and addressing identified vulnerabilities.
- Ensured optimal performance and code quality by identifying and resolving defects through the development and execution of comprehensive test cases.
- Conducted a Proof of Concept (POC) and provided accurate effort and timeline estimates to inform project planning and decision-making.

Swapoolabs (Makatisoft Inc.) ✎

04/2022 – 08/2022 | Taguig, Philippines

Software Engineer Intern

- Completed an online Udemy course covering React, REST APIs with Flask and Python, Advanced REST APIs with Flask and Python, and Amazon Web Services (AWS).
- Applied skills gained from the training to develop both frontend and backend components of a production application.
- Implemented unit testing to ensure code reliability and functionality.
- Utilized Jenkins to automate builds and deployments, and performed testing on the development server to validate application performance.
