📄 PROFILE

A full stack developer highly trained to work with minimal supervision who writes clean, elegant, and maintainable code. Looking for a long-term position to further grow.

🎓 EDUCATION

**Bachelor of Science in Information
Communication Technology**
Rizal Technological University
Mandaluyong, Philippines

🛠 PROFESSIONAL EXPERIENCE

Stratpoint Technologies

Software Engineer II

08/2022 – 05/2024 | Mandaluyong, Philippines

- Transitioned between various internal and client projects being a full-stack developer, utilizing React.js and Next.js for frontend, Express.js for backend, conducting unit testing, utilizing both SQL and NoSQL databases, delivering demos, while adhering to Agile Scrum methodologies.
- Engage in collaborative discussions with a multidisciplinary team comprising engineers, designers, producers, and clients, facilitating effective communication to address both frontend and backend requirements in technical discussions.
- Improved system security and minimized potential risks by identifying and addressing security vulnerabilities through thorough Vulnerability Assessment and Penetration Testing (VAPT).
- Guaranteed peak performance and code excellence by pinpointing and rectifying defects through the creation and execution of comprehensive test cases for existing code.
- Conducted a proof of concept (POC) and provided an estimate for an upcoming project proposal for our clients.

Swapoolabs

Software Engineer Intern

04/2022 – 08/2022 | Taguig, Philippines

- Completed an online Udemy course covering React, REST APIs with Flask and Python, Advanced REST APIs with Flask and Python, and Amazon Web Services (AWS).
- After completing the training, undertook tasks for both frontend and backend components of the application, accompanied by unit testing. Utilized Jenkins for building the application and performed testing on the development server.
